Why Digimune?

The digital world is so much more than mere bits and bytes, algorithms and apps. It's people doing business, learning, gaming, falling in love... and committing crimes.

At Digimune, we don't believe that the threat of fraud, ruined reputations and bullying should be allowed to cast a shadow over your digital life. That's why we design ahead-of-the-curve solutions that provide comprehensive protection for all your devices.

By eliminating threats and providing cyber protection education, we provide meaningful support to victims, giving you back your freedom to connect to people, knowledge, products, services and business.

As the industry leader in digital risk protection, we say to you: Live free.

The threats are real

92%

of consumers are concerned about their online privacy

40%

of cybercrime victims suffer financial losses

75%

of organisations worldwide face ransomware attacks

600

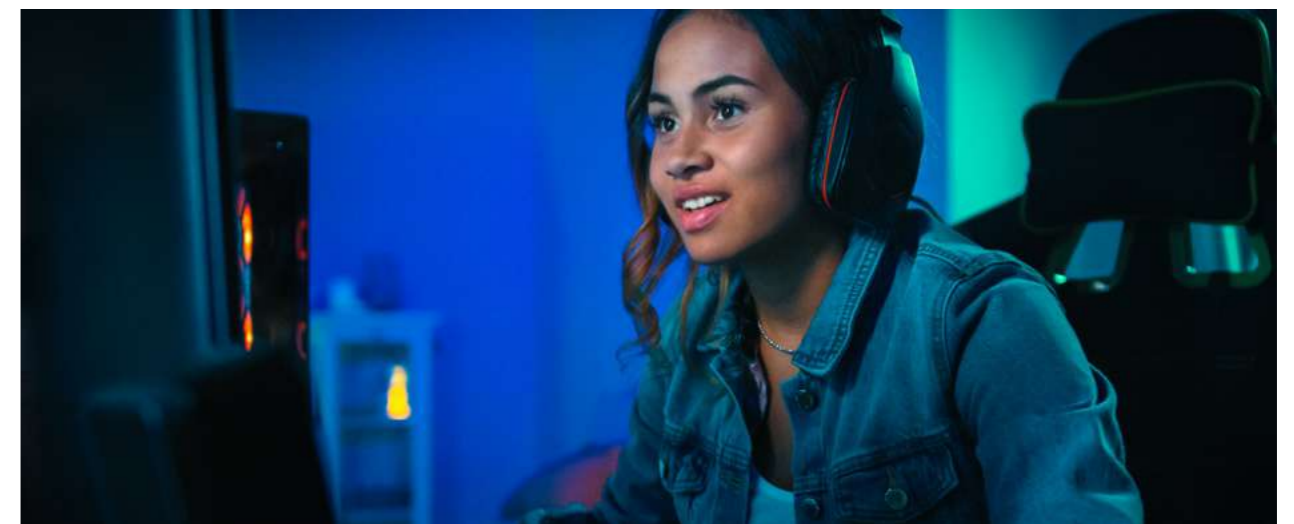

malware attacks occur in South Africa every hour

How Digimune steps into the breach

At Digimune, protecting you is what we do. Cyberthreats are so pervasive, it's not a question of if you'll become a target, but when. The difference for Digimune customers is that they live to earn, learn, stream or play another day – every day.

Because we know that a set of digital burglar bars won't cut it, we never stop working to stay one step ahead of the digital threat curve. Our advanced cloud-based AI technology processes, monitors and mediates online risks whenever you are using the internet.

Our Mission

Digimune strives to free the digital world from fear and all its harmful effects. We do this by developing solutions that curb cybercrime on every platform with proactive intelligence designed to disrupt phishing, impersonations, malicious content and data leaks across the public, deep and dark web.

Our Vision

To become the world's leading cloud-based cybersecurity services provider, guarding all users against online threats, enabling them to truly live free by using the internet for what it was made for.

Who Digimune protects

- Individuals
- Families
- Small and medium enterprises
- Brands

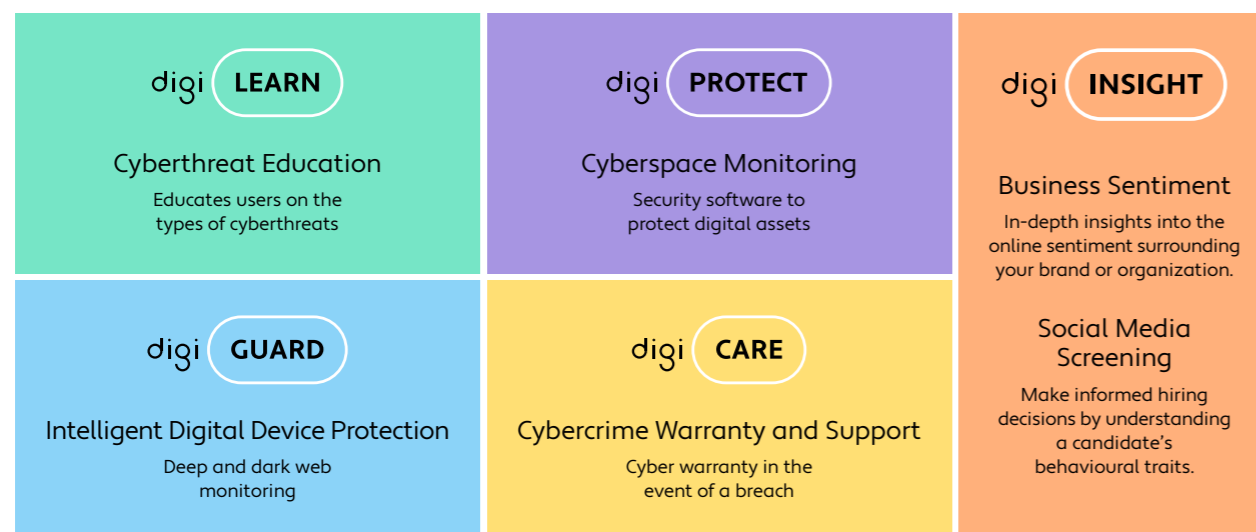

What your digital guardian can do for you

What do you expect from an industry leader in social media protection and cybersecurity? Broad spectrum safeguarding that plugs all the gaps? Sure, Digimune has you covered, but not everyone has the same needs – or gaps. That's why we offer a wide range of packages that can be tailored with optional extras. It's also possible to create a truly custom solution in consultation with us.

All packages are compatible with Windows, MacOS, Android as well as iOS and include cloud backup so that you can restore lost data in the event of an incident.

Select what cybersecurity solution best suits your needs:

Thanks to our partnership with Norton, Digimune also offers a range of specialised products at premiums you won't find anywhere else. Norton products are included in the DigiProtect range or can be added as a standalone option.

For the full rundown of our product features and specifications, please visit our website: www.digimune.com

We've got you covered from all angles

Digimune provides a comprehensive warranty for all cyber insurance claims, which covers defence costs, settlements and first-party breach response expenses. The warranty covers customers' data breach actions or outcomes, such as compromised paper files or lost devices. Coverage kicks in if a covered incident occurs and is reported during a policy period.

Digi-Insight – Business sentiment

Our business sentiment report enables you to gain an in-depth insight into the online sentiment surrounding your brand or organization & yields numerous benefits, some of which include;

- Providing you with an understanding what your target audience likes and dislikes about your brand.
- Gaining insight into the kinds of issues customers are having with your product.
- Identifying key insights into areas where your marketing could be improved.
- Finding a way to speak directly to your customers pain points.
- Understanding how often your brand is being spoken about, general thoughts on your brand and on which platforms.
- Formulation of a social listening strategy to stay informed.
Establishing how your business can improve in different areas.

Digi-Insight – Social & Digital Media Screening

Make informed hiring decisions by understanding a candidate's behavioural traits and their potential alignment with existing company culture.

Digimune's Social & Digital Media Screening report will allow an organisation to make more informed hiring decisions by identifying high-quality candidates quicker, protecting the organisation from high-risk individuals (discrimination, defamation and illegal activities), building a productive work environment and maintaining or improving on an existing company culture.

A close-up photograph of two hands, one with dark skin and one with light skin, holding each other. The hands are positioned in the center of the frame. A horizontal, multi-colored graphic element (yellow, green, blue, purple) with rounded ends is overlaid across the hands. The text "Explore our digital world unhindered." is written in white, sans-serif font within this graphic.

Explore our digital world unhindered.

Ready to put an end to your cyber concerns?

At Digimune, we put our barriers in place so you can remove yours. We want you to live free and be free, so you can enjoy the internet for what it was made for. Want to chat? Please reach out to us at the information below.
